

An Optimum Solution is Proposed Interweaving a Variety of Professional Specialties.

The Hibino Group, an Ever-Evolving Group for the Creation of “Emotions”.

Under its slogan “THE SOUND & VISUAL SPECIALISTS” the Hibino Group continues to leave a footprint befitting of a pioneer in the fields of acoustics, images, music and live events. What is most important to the Hibino Group? The Hibino Group firmly believes that there is only one way for it to become valuable to its customers. This can be accomplished by adding an “analog” value that can be created only by humans and by adding the state-of-the-art technology and know-how in the digital field as a “premise” to “operational technology” to identify and coordinate the infinitesimal quality of sound, hues and other elements that cannot be processed digitally. This will become complete

when craftsmen’s skills acquired through experience and emotions are also added.

As digitalization accelerates as at present, the professional resources of the Hibino Group in acoustics, images and lighting are creating a higher set of values and the stages awaiting these professional resources are spreading from Japan to the entire world.

With the intention of further enhancing its “total solution” function to propose integrated and comprehensive solutions to meet the ever-diversifying requirements of its customers, the Hibino Group is proactively undertaking various measures to reinforce the overall competence of the Group.

Sales and Installation Business

hibino marketing

- **Hibino Corporation hibino marketing Div.**
Businesses related to the sales of professional audio equipment. Design, installation and maintenance of systems
- **Hibino Intersound Corporation**
Sales of professional audio and video equipment. Design, installation and maintenance of related systems
- **ELECTORI CO., LTD.**
Sales of professional audio, video and control equipment. Design, installation and maintenance of related systems. Sales of consumer audio equipment
- **TECHNO HOUSE INC.**
Sales of professional video and audio equipment. Design, installation and maintenance of related systems
- **Hibino Lighting Inc.**
Sales of lighting equipment for business use. Design, installation and maintenance of related systems

hibino chromatek group

- **Hibino Corporation hibino chromatek Div.**
Development, manufacture and sales of LED displays and systems
- **Hibino Asia Pacific Limited**
Sales of LED displays and peripheral equipment

Architectural Acoustics Installation Business

- **Nihon Onkyo Engineering Co., Ltd.**
Design and installation of architectural acoustics. Development, manufacture and sales of acoustic products. Consulting on Sound and Vibration, surveys and measurement
- **NIPPON ENVIRONMENT AMENITY CO., LTD.**
Design and installation of architectural acoustics. Development, manufacture and sales of acoustic products. Consulting on Sound and Vibration, surveys and measurement
- **SANOI CORPORATION**
Design and Installation of Industrial noise countermeasures. Development, manufacture and sales of products for industrial noise control
- **NOE Asia Pacific Company Limited**
Design and installation of architectural acoustics. Development, manufacture and sales of acoustic products. Consulting on Sound and Vibration, surveys and measurement

Other

- **Hibino Entertainment Corporation**
Managing entertainment business overall at hibino group including operation of live music club
- **Eightythree Corporation**
Operation of “Kennedy House Ginza,” a live house

hibino engineering

- **Hibino Spacetech Corporation**
Sales of professional audio and video equipment. Design, installation and maintenance of professional audio and video systems
- **Hibino Imagineering Corporation**
Sales of professional audio and video equipment to movie theaters and halls. Design, installation and maintenance of related systems

Sama Sound group

- **Sama Sound Inc.**
Sales of professional and consumer audio equipment
- **Sama D&I Co., Ltd.**
Sales of professional and consumer audio equipment
- **Sama CDS Inc.**
Sales of professional audio equipment. Design, installation and maintenance of related systems

Concert and Event Services Business

hibino sound group

- **Hibino Corporation hibino sound Div.**
Planning, rental and operation of acoustic systems for concerts and events. Live event recording

Hibino Group's
management structures

Proposing Optimal Products and Solutions Meeting the Needs of Audio and Video Systems Responding to More Diverse and High Quality of the Day.

Since its establishment in 1985, Hibino Intersound has constantly proposed optimal solutions tailored to customer needs, fully utilizing its versatile live acoustic technology and audio and video system integration technology developed as a Hibino Group company. Hibino Intersound has won the satisfaction of customers of facilities in many business segments including large halls, live event venues and music-related facilities, meeting rooms for corporate customers and commercial facilities.

2022.05

HIBINO Hibino Intersound Corporation <https://www.hibino-intersound.co.jp/>

Total Systems for Sounds and Images Proposed

The scenes for the utilization of total systems that integrate sounds and images are increasingly expanding to various segments of society. Responding to these needs of the times, Hibino Intersound Corporation meets the requirements of its customers that are becoming more diverse and higher quality, fully utilizing its in-depth expertise, know-how and specialist knowledge of the Hibino Group in the audio and video field.

Versatile Lineup of Equipment of Quality Brands

Since its establishment, Hibino Intersound has been importing and selling audio and video equipment that is enjoying a high reputation globally for high reliability. Hibino Intersound selects equipment manufacturers deserve a partnership. The selection is made from the standpoints of innovation, technological power and future potential. The products manufactured by these manufacturers ranging from equipment for business use such as large mixing consoles for broadcasting stations to consumer products that are rich in variation. These products are sold through the network of Hibino Intersound hand in hand with its high-quality services.

Some of the Brands Sold

Company Profile. Corporate Name: Hibino Intersound Corporation, **Head Office Address:** 2-7-70 Kaigan, Minato-ku, Tokyo 105-0022 Japan, **Established:** May 14 1985, **Representative:** Hiroshi Ikegaki, President, **Business Lines:** ●Import agency and selling of audio equipment ●Import agency and selling of computer equipmen ●Import agency, selling and system consultancy of video equipment ●Design, installation, sound isolation work and construction consultancy of studios

Seven-inch Modera X Series Panels afford fingertip control of in-room settings.

Creating impressive time and space to rouse emotion in the human heart, selecting "the first-class high quality products in the world" with stern eye.

Electori Co., Ltd. has reached the market for the audio/visual equipment for commercial and professional, and video and information equipment since established.

"The first-class high quality product in the world" selected from various diversity of perspectives with sound quality, durability, originality and spirit of innovation has created great impression becoming a core of the specification design for facility and AV room such as school, government and public office, and entertainment space, etc.

2021.05

ELECTORI CO., LTD.

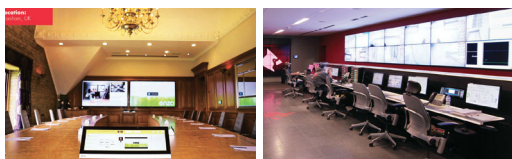

<https://www.electori.co.jp/>

Professional Division

Offer the key product to create space producing productive communication.

Starting with the top brand "AMX" of control equipment for professional use connecting audio and video equipment and every ICT (Information and Communication Technology) equipments seamlessly, delivering the core product of audio and visual system design in large-sized facility, such as school and government and public office, etc.

Business Lines

- Import and sale of musical instrument related equipment
- Import and sale of amusement installation equipment
- Import, sale and design of A/V control system

Principal Brands Handled

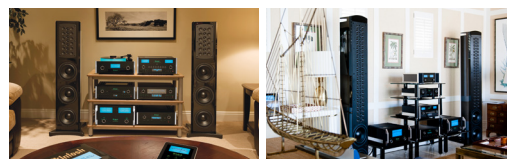

Consumer Division

The highly evaluated nature/essence of the only the first-class product. Deliver the delight and pleasantness of audio to the music lovers.

Presenting a large lineup of equipment extensively to fulfill the expectation of high quality sound to the audiophiles, revolving "McIntosh" globally and highly evaluated as a leading brand of the high-end audio for consumers.

Business Lines

- Import and sale of high-end audio equipment for consumer
- Consulting of high-end audio

Principal Brands Handled

Company Profile. Corporate Name: ELECTORI CO., LTD., **Head Office Address:** 2-7-70 Kaigan, Minato-ku, Tokyo 105-0022 Japan, **Established:** Dec. 23 1964, **Representative:** Yoshifumi Yasui, President, **Business Lines:** Import and selling of audio equipment for consumers and professionals and video and information equipment

A distributor/system integrator that imports and supplies highly qualified devices.

Techno House Inc. is a group of technicians derived from the technical development section of post-production. Since establishment, we have been working as a distributor importing and selling reliable products and as a system integrator that builds customer systems.

2022.04

Techno House Inc.

● Broadcasting & Video equipment

We deal with professional products related to broadcasting and video, centering on products with a focus on broadcasting stations and post-production. Please feel free to contact us for equipment required for broadcasting stations and video production such as optical transmission equipment, mobile relay system products, encoders / decoders, 4K / 8K compatible cameras, time code generators, to IP video transmission systems.

Vioctem 4KSDI-MINI compact 4K camera module (IO Industries)

SCORPION Smart Media Processing Platform (evertz)

● Pro Audio Equipment

We deal with many products for TV stations and Radio stations. We have a lineup of products that are indispensable for studio system configuration, such as IP Codecs, Audio Distribution Amplifier, Audio Processors, Digital Mixers, and ON AIR Signal.

We have a wide range of introduction cases from Large studios to Remote studios, so we are always being contacted for consultation services such as on system updating as well as products. Please feel free to contact us for consultations.

APT IP CODEC Horizon NextGen (Worldcastsystems)

SX2 digital mixer (DHD.audio)

● Rental Staging and Fixed Installation Products

We deal with products such as switchers, converters, and media servers used for projection mapping and digital signage for events, fixed installations, and convention halls. We provide a range of products or different signal types and input/output terminals and can construct systems for different needs.

We also provide swift on-site support should a problem occur with a product.

E2 Gen2 Presentation Switcher (BARCO)

Heavy-duty converter Xvision (Theatrix)

Company Profile. Corporate Name: Techno House Inc. **Head Office Address:** 2-7-70 Kaigan, Minato-ku, Tokyo 105-0022 Japan **Established:** April 1988, **Representative:** Ryuji Enomoto, President, **Business Lines:** Import and sales of commercial video and acoustic devices, design and construction of video and acoustic editing room systems

Stage lighting maximizing the value of performance spaces

With beautiful light and the latest in dimming technologies, we support the creation of stages that entrance the viewer.

Hibino Lighting Inc. sells stage lighting equipment and designs and builds systems. Our experienced staff provide a diverse array of stage lights to meet various requirements, lighting consoles to enable effective performances, and systems to maximize the performance of such equipment.

2022.04

HIBINO Hibino Lighting Inc.
<https://www.hibinolighting.co.jp/>

● Stage Lighting Equipment

We handle a wide range of lighting fixtures and related products from Japan and overseas, and this enables us to respond to diverse requirements for performance spaces.

Maverick Silens 2 Profile / High-quality moving light with excellent quietness

Ovation Réve E-3 / Ellipsoidal light that delivers bright lighting to faraway positions

IVL Pyramide / Light that provides unique immersive lighting

High-performance network devices such as nodes and switches

● Lighting Consoles

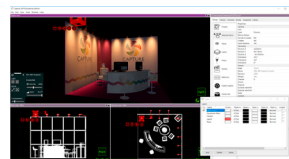

We provide lighting consoles that meet the requirements of advanced performances, and hold workshops over the country that showcase the latest in operation technologies.

Diamond 9 330 / Lighting console that creates high-quality stages

Arena / Lighting console that provides intuitive operations

Visualization software for beautiful graphics

● Performance Lighting Systems

Our experienced staff provide everything from planning and design to the construction and maintenance of performance lighting systems to meet the requirements of various applications.

Optimize your space efficiency and enhance your immersive experience, maximizing our system services in high-quality sound and visual image.

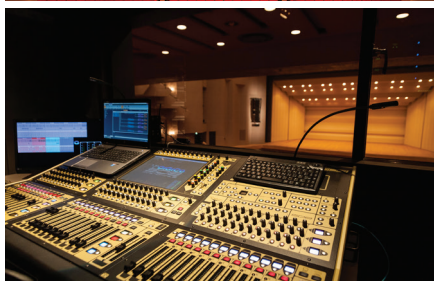

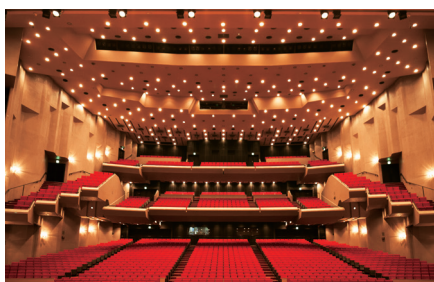

Founded in 1960, Hibino Spacotech Corporation has provided innovation solutions in a wide range of fields including system engineering, sales promotion, and business support with professional audio and video equipments, based on our in-depth experience and reliable support & services.

2020.10

HIBINO Hibino Spacotech Corporation
<https://www.hibino-spacotech.co.jp/>

● System business

Create one-of-a-kind premium system only for you

Through a lot prior discussion and review with you, all the system we service becomes to be the only one. Our expertise on acoustic and visual image can optimize your space efficiency and improve business environments.

● Space creation business

Provide comfortable "space direction solutions" by using sound and audio visual.

Combining together with lighting and contents our audio visual experience, technique and expertise ever built up through business since 1960, ensure we can offer one-stop services ranging from rental machinery and equipment, system engineering and field operation support.

Meet customer's demands for which we shape the latest trend or added values with audio visual hardware system and application supported by advanced IT (Information Technology) and AI (Artificial Intelligence) technology.

● Sales promotion business

Enable you to realize unique sales promotion by way of many kinds of services

Support your sales promotion by planning and producing sound and visual image, ranging from music delivery making people feel good at stores, commercial production, to event operation. Offer you not only contents streaming services made on our own music delivery facility also but peripherals such as display, terminals or playback devices.

Experts to Solve the Needs Related to Various Sounds Featuring Unique Technologies and Experiences.

As an expert in “sound”, Nihon Onkyo Engineering solves the diverse needs of the customers through proposals, designs, production and the delivery of products and services.

2022.04

NIHON ONKYO ENGINEERING

Nihon Onkyo Engineering Co., Ltd.

NOE Asia Pacific Company Limited (Bangkok, Thailand)

<https://www.noe-ap.com/> <https://www.noe-ap.com/>

● Architectural Planning, Acoustic Design and Installation

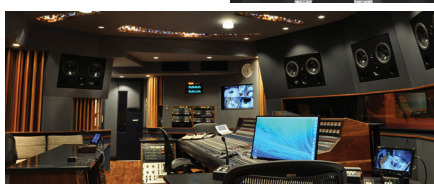

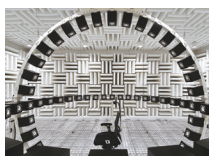

Nihon Onkyo Engineering is an expert specialized in acoustic design and interior finishing work of large and small spaces, with unique architectural acoustic technologies as a core competence.

The facilities for creative works such as broadcasting studios, recording studios, postproduction studios and halls, the research and experimental facilities of manufacturers such as anechoic rooms and reverberation rooms, and audio rooms and practice rooms for music players are provided.

Nihon Onkyo Engineering works as a fully-responsible contractor achieving acoustical requirements and specifications, the company is seamlessly in charge from planning and design to delivery.

The members have capabilities of design and project management including field operations, versatile experience and state-of-the-art technologies acquired through working as a fully-responsible contractor of acoustical requirements.

Nihon Onkyo Engineering has top class recognition and achievements in the Japanese architectural acoustic market.

● Consulting, Noise Improvement, Research and Development

Nihon Onkyo Engineering provides consulting services on sound and vibration based on the acoustic measurement technology developed in architectural acoustics. Invisible sounds and vibration are measured and analyzed as physical quantities. Moreover, wide-range of support is provided from surveys to mapping out of countermeasures, to improve environments through resolving acoustic problems caused by noise or vibration.

Nihon Onkyo Engineering is actively undertaking research and development activities as a motive power to create new values tuned to the changes in the needs. As facilities to propel this task, Acoustic Research Laboratory has been set up, equipped with anechoic rooms, large and small reverberation rooms, listening rooms, and the systems for measuring the parameters characterizing various acoustic materials. These facilities are used in contracted testing services as well.

Using NOE Asia Pacific Co. Ltd., established in Bangkok, Thailand, as a bridgehead of geographical expansion, global business realization is being promoted.

● System Products

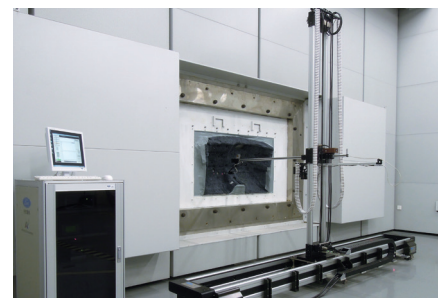

Using the core technologies of “visualization of sounds”, “simulation to predict acoustical characteristics and sound propagation”, and “identification of noise sources”, Nihon Onkyo Engineering develops and provides the system products such as measuring equipment and software to support customer’s R&D activities including automotive and electric manufactures. Also we are providing the noise monitoring systems for aircraft noises.

Automatic measuring system for aircraft noise

Sound source probing and visualization system

System for evaluation of performances of automotive soundproof materials

Company Profile. Corporate Name:Nihon Onkyo Engineering Co., Ltd., **Head Office Address:**BR Ryogoku Building 2, 1-21-10 Midori, Sumida-ku, Tokyo 130-0021 Japan, **Established :** March 3 1972, **Representative :** Tadayuki Yamanashi, President, **Business Lines :** ●Planning of architectural and acoustic work, acoustic design and installation management ●Contractor for architectural and acoustic work ●Noise improvements and consulting ●Development, selling and maintenance of acoustic facilities and measurement systems ●Leasing, operation and management of acoustic facilities and measurement systems ●Consultancy and contract research and development

Creating comfortable environments for a new age via a wide range of experience and the latest technologies

NIPPON ENVIRONMENT AMENITY CO., LTD. has built an integrated system for preliminary surveying and measurement to design and construction for a wide range of sound proofing, vibration proofing, acoustics, and shielding, based on technologies cultivated over long years. We eagerly work on the development of new systems and new technologies to meet customer needs for comfortable environments that become more advanced and diversify with the times.

2019.07

NIPPON ENVIRONMENT AMENITY CO., LTD.

<https://nea-ltd.com>

● Building Acoustics

We handle everything from design to construction for buildings that require sound field spaces and high vibration proofing performance, such as theatres, halls, television studios, and piano soundproof rooms.

Vibration proof antiseismic ceiling system for high loads for ministerial notification

Sono Ceiling Tough Co-developed product

This product supports the ceilings specified by Notification No. 771 of the Ministry of Land, Infrastructure, Transport and Tourism, and was co-developed by Nippon Environment Amenity, Kurashiki Kako Co., Ltd., Toprise Co., Ltd., and Kirii Construction Materials Co., Ltd.

● Industrial Sound Proofing

There are four main measures for industrial sound proofing, which are sound absorption and insulation using sound proofing panels, sound absorption and insulation using noise reduction louvers at locations where air enters and exits, sound absorption using sound absorption panels, and advanced sound reduction using new technology. Nippon Environment Amenity ambitiously works on co-development and our sound proofing panels and silencers are adopted in various locations, such as composite facilities, data centers, and hospitals.

Advanced sound reduction device

Duracalm® E-fx Co-developed product

The next-generation advanced sound reduction device Duracalm E-fx was born out of co-development with Professor Yasuhiro Kawai of Kansai University. It reduces the edge effect to provide excellent sound reduction.

● Railway and Road Sound Proofing

We have rich experience with sound proofing for railways and expressways that handle a large volume of freight and passengers cars on a daily basis.

● Electromagnetic Shielding

Electromagnetic shielding is a technology for blocking electromagnetic waves as an architectural space. We provide technology for hindering the propagation of electromagnetic waves in locations such as anechoic chambers, data centers, theatres, and television station studios.

Company Profile. Corporate Name : NIPPON ENVIRONMENT AMENITY CO., LTD, **Head Office Address:** KDX Takanawadai Building, 3-5-23 Takanawa, Minato-ku, Tokyo 108-0074 Japan, **Established:** February 5, 1988, **Representative:** Shingo Isshiki, President, **Business Lines:** Sound and vibration proofing for building acoustics, industrial sound proofing, sound proofing panels for railways/roads, electric wave/electromagnetic wave shielding, noise/acoustics/vibration measurement and consulting (registered environmental measurement certification business)

Armed with 40 years of experience and customer confidence, we can provide sound- and vibration-proofing technologies from downtown Tokyo to the world

Sanoh Corporation has more than 40 years of experience in planning, design, production, installation, and measurement for sound- and vibration-proofing, with a focus on consulting noise reduction. During this time, we have seen great diversification in our product lines including sound insulation sheets, damping materials, underfloor air conditioning, and soundproofing canvas. We aim for further growth by developing our technologies and equipment to meet new market needs.

2022.04

SANOH CORPORATION

<https://sanoh-t.com>

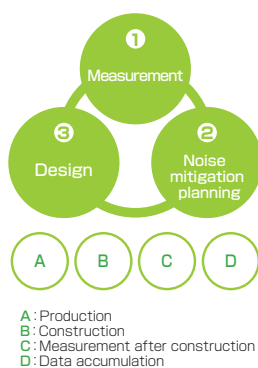

We leverage our strengths to provide one-stop solutions from noise measurement to design and construction

The strength of Sanoh Corporation is our in-house system which covers upstream to downstream services including noise measurement, noise mitigation planning, design, construction, and data accumulation. Our soundproofing equipment and panels are uniquely manufactured in our factory, thus enables us to respond to our customer requirements, keep down costs, and flexibly implement noise countermeasures. With increasing demand for further improved soundproofing environment in the future, we will contribute to the society by flexibly adjusting to new technological innovations and making good use of our rich know-how.

Consulting Services

In order to solve noise problems, we provide consulting services that cover upstream to downstream including noise measurement and design (see 1 to 3 in the figure on the right). Data management based on detailed measurements, enables us to propose flexible countermeasures to meet needs of our customers. Our experts provide precise technologies and consulting in design, production, and construction processes, with which we can greatly contribute to the society.

Services we can provide to address and help solve noise problems

Soundproofing Works

Sanoh Corporation has experience with more than 6,000 soundproofing projects. We solve noise problems in all locations, such as skyscrapers, plants, laboratories, hotels, educational institutions, public facilities, and apartment buildings.

Silencer

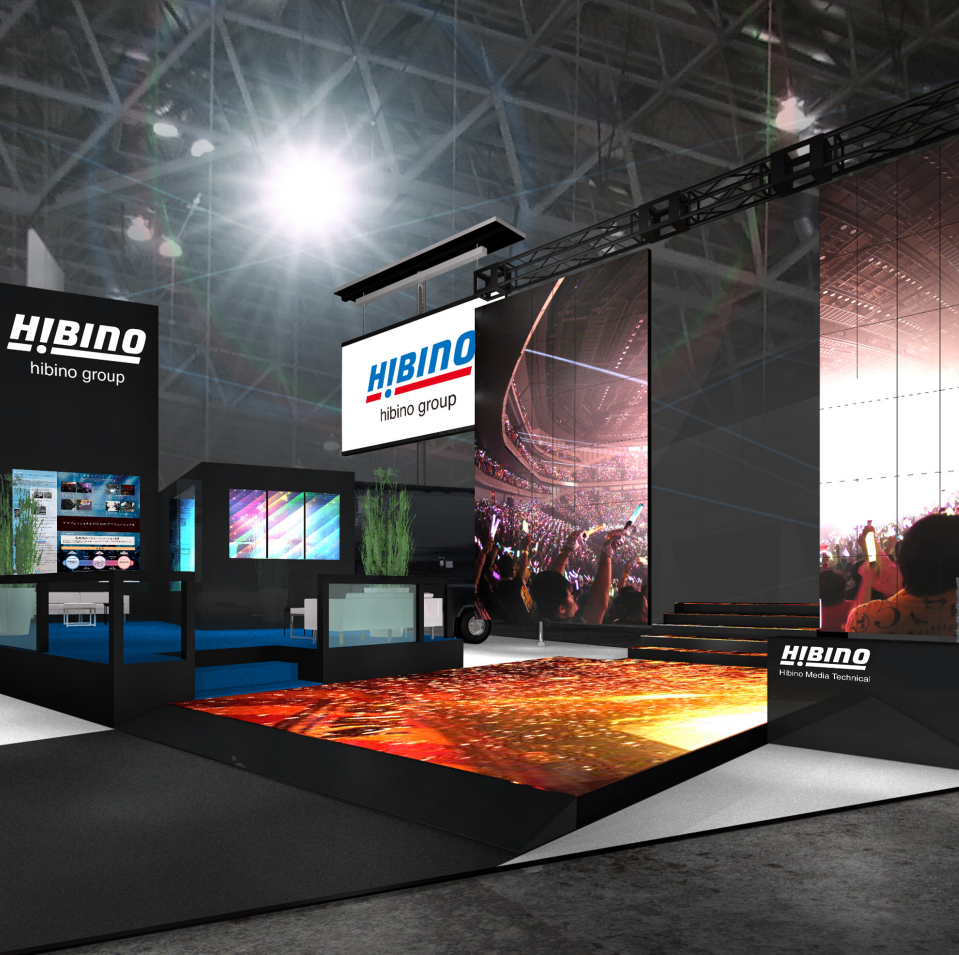

Sound is generated by vibrations in the air and travels at the speed of 340 meters per second. We absorb or deflect these vibrations with silencers by using damping materials and reflectors to increase soundproofing performance. Sanoh Corporation can propose silencers to meet the needs of any sites. This is one of the strength our company.

Noise Measurement and Calculation

Before embarking on soundproofing projects, we must measure noise sources and volumes. This is an extremely difficult task, but we have gone through as many as 12,000 cases of such measurement. Our experience and expertise accumulated over 40 years since the founding of our company testifies that we can perform professional noise measurement and calculation.

Demonstrating its experience and know-how in all MICE segments
A total planner for providing “emotion” far exceeding customer requirements.

Hibino Media Technical has been providing high-level operational know-how to the event and convention organizers, centering on the rental business of image, acoustic and information technology (IT) equipment. Especially after changing its corporate name in 2010 to the present name, “Hibino Media Technical Corporation,” the company is expanding its activity fields as a total planner providing services that satisfy customer requirements more than 100%.

2021.10

HIBINO Hibino Media Technical Corporation
<https://www.media-t.co.jp/>

● Event and Convention Division

The division rents video, acoustic and other professional equipment, as well as personal computers and network systems. The division staff endowed with versatile experiences and competence propose optimal solutions tailored to specific requirements ranging from small meetings to large events.

● Produce Division

Four phases that are indispensable to organizing events, namely, planning, operation, direction and image production, are linked to one concept and are supported by a one-stop service. The division creates emotion exceeding the satisfaction of all segments of meetings, incentives, conventions and exhibitions (MICE).

● Job Market Division

The division supports career changes and personnel placement for creator personnel specialized in video, acoustics, websites, publishing and advertising. The division takes on the challenge of creating an employment service for the next generation through human solutions that link the needs of both employers and employees.

● Video production

● Audio

● Website and game design

● Design

● Publishing

● Advertising and events

● Medianix Osaka Division

The division is responsible for the Kansai market of Japan, specialized in renting, system proposal and dispatching operators for audio-video-IT equipment to medical academic meetings and MICE, as well as recording, editing and producing video footage. New event styles are proposed with infallible technology and free ideas.

We are video equipment coordinators.

Our job at Sigma A & V and Rental Corporation is to coordinate video equipment. What do customers want when they visit an event? We believe that they want to experience an extraordinary space. In order to achieve this, we support events via our expertise in the field of video.

2022.04

Sigma A & V and Rental Corporation

<https://www.sigma-web.co.jp/>

Visual System Division

In addition to the rental of video and acoustic equipment, we provide equipment coordination and operation services to meet the needs of individual events.

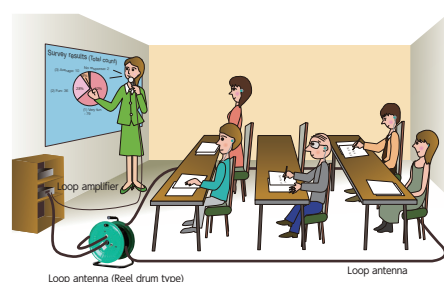

We have focused on large-scale video since our company was established, and have accumulated a wide range of expertise and equipment since that time.

Our strength is our ability to provide comprehensive solutions that cover everything from equipment coordination to large-scale video content for events.

Welfare Apparatus Sales Division

At the Welfare Apparatus Sales Division, we provide hearing loop systems to those that are hard of hearing or suffering from post-lingual deafness. Demand for the installation of hearing loop systems is increasing due to requirements for universal design in public spaces. Our systems help those hard of hearing and the elderly to fully participate in society without concern. Urban planning where everyone can hear is our way to ensure future happiness.

Emotions, relaxation,
and new discoveries for
everyone, everywhere.
New possibilities for
entertainment.

Hibino Entertainment Corporation is a professional organization that creates experiences that transcend the boundaries of all sections as a company that manages the entertainment business of the Hibino Group. We propose new entertainment value for all of the people through music from the perspective of experiences and content.

2022.04

HIBINO Hibino Entertainment Corporation
<https://www.hibino-entertainment.co.jp>

● Live & Entertainment Business

We conduct business in the field of live music and entertainment, such as the administration of live music clubs and music studios, planning and production for live music and events, planning, production, and sales of music software, artist management, and music rights management.

**Live music restaurant
Kennedy House Ginza**
A live music club that enables guests to dine while enjoying live music. Exclusive bands provide enjoyable music from genres such as rock, pop, and group sounds.

Feel the Pride and Joy of the Hibino Group in a High-Quality Space Filled with Sounds of High Audio Grade.

Through the operation and management of the Kennedy House Ginza, a live event venue with a long history, Eightythree Corporation plays its part of developing new business in the Hibino Group. The versatile know-how of live events and knowledge of audio equipment possessed by the Hibino Group is utilized to the maximum. Its passion is spent in pursuing new services that provide emotions to the people who visit the Kennedy House Ginza.

2022.10

Eightythree Corporation
<https://www.kennedyhouse-ginza.com/>

The entertainment space only the Hibino Group can create conveys the Value of Music widely to the public.

The Kennedy House Ginza is a space that transmits music and provides the enjoyment of live events. It functions as an antenna shop to experience and vividly sense the know-how, pride and effect of acoustic system of the Hibino Group, the space also a cultural facility to widely deliver the value of music to society. Enjoying a good meal and wine while giving oneself up to high-grade sounds is indeed a moment of high quality to the visiting customers, allowing them to forget their everyday cares. The audio environment created only by the Hibino Group is also enjoying high popularity among the musicians who perform in live events there.

Kennedy House Ginza

A long-established live event venue in Ginza managed for 30 years by Kunihiko Kase, the leader of The Wild Ones, a creator of many hits as a leading vocal group that enjoyed popularity in the group sound boom in Japan in the latter half of the 1960s. Under the concept "A smile and energy through the power of music," live music is played ranging from nostalgic rock music and pop to the most recent hits for customers of a wide range of generations.

Kennedy House Ginza band Super Wonderland
